

USER – AGENT

TRANSACTIONS PAGE:

- Top Buttons switch from 4 to 5 (All Clickable).
- Titles (Number Colors): Total Transactions (Black), Needs Attention (Red), Active (Green), Pending (Orange), Sold (Blue).
- Needs Attention Box – only flags transactions that have uploaded files that were Rejected or Denied by User Broker or User Compliance Officer. Or if User Broker/Compliance Officer post a comment in the transaction.
- Example Text in the Search Bar – Italic Title Case (Search Address, Client, MLS...).
- All Statuses drop-down in Search Bar – Remove “Open” it’s the same as Active.

+ NEW TRANSACTION PAGE:

- Under Property Information, verbiage should read as, “Enter a Property Address **and/or** an APN – Land transactions often only have an APN.”.
- Example Text for Property Address – Change “Bush” to “Brush” so my real address isn’t listed.
- Example Text for APN – Change from “3205-005-0002” to “3205-005-002” (For accuracy).
- Example Text for Sales Price – Change to \$1,699,500.00, more professional looking price.

SEARCH PAGE:

- Change to match Search Bar under Transactions Page, without “Needs Attention” button.
- Results Box add same filters as Transaction Page (Property, Price, Type, Age, Status).
- The Search Results on Search Page pulls up all transactions for the entire Brokerage, while the Search Results on the Transaction Page only pulls up transactions for that user Agent.

TRANSACTION CHECKLIST PAGE (FOR ALL TRANSACTION TYPES):

- Move “Comments Box” from bottom of page up to underneath the “Details Box” since this will be comments/notes for the transaction as a whole.
- Re-Add second description line information – but ONLY for the different contract types. Contracts have multiple mandatory disclosures included automatically. See add-on information below in red for each contract type:
 - o RLA – Residential Listing Agreement
(Includes AD, MLSA, BCA, PRBS, FHDA, SA & CCPA)
 - o RPA – Residential Purchase Agreement
(Includes AD, FRR-PA, BIA, PRBS, FHDA, BHIA, WFA & CCPA)

 - o WFDA - Wildfire Disaster Advisory
 - o WHSD - Water Heater and Smoke Detector Statement of Compliance
 - o WOO - Withdrawal of Offer
- Would it be cleaner/easier if we added one of those widgets next to each Form Category that you could click to expand/open the forms that are underneath it? And when you click it again it folds it back up. So, each category can expand/contract for MLS Data Sheets, Mandatory Disclosures, Additional Disclosures, Escrow Documents, Reports Certificates & Clearances, and Release Disclosures. And Listing/Purchase Contracts is open by default since it is the main contract for the file. Does that make sense?

USERS – BROKER & COMPLIANCE OFFICER

TRANSACTIONS PAGE:

- All the same changes as *USER – AGENT*, except for “Needs Attention” requirements.
- Needs Attention Box – only flags transactions that have and “Pending Review” uploads by User Agent. Or if User Agent posts a comment in the transaction.
- When opening a “Needs Attention” transaction, only display the Forms that are Pending Review or has a posted comment that hasn’t been seen yet. This will make for quicker access/a easier workflow for User Broker/Compliance Officer.
- Total Transactions Box – counts total office transaction like it already does now.

+ NEW TRANSACTION PAGE:

- All the same changes as *USER – AGENT*.

SEARCH PAGE:

- All the same changes as *USER – AGENT*.

AUDIT PAGE:

- I have no changes needed for this page.

USER – BROKER (ONLY)

TRANSACTIONS PAGE:

- Add a red Delete Button next to the Open Button for all transactions, giving User Broker the option to delete any transaction they choose to. Have a secondary pop-up warning when Delete is pressed to confirm their action and make sure it wasn't clicked on by mistake. This is in case the Duplication glitch isn't fixed; the Broker would have the ability to remove the duplicate transactions.

TEAM PAGE:

- Need a way for sending out a mass email invite for large Brokerages to their Agents. Maybe, for now, to send an Agent invite to multiple email addresses, they can put in emails separated by using a comma like Gmail does?
- Under Members Box – Updating member roles needs to be either right justified in each Member's Box, or something to keep the page looking lined up and organized. This will act like an agent roster for Brokers in a sense. Also, maybe have a filter bar like on the Transactions Page for Brokers that have a lot of agents, so it's easier to sort? Filter by: Name, Date Added, Role, Active/Inactive (Agents tend to bounce around from one broker, to another, then back again).

SIGN OUT DROP-DOWN MENU:

- Maybe between Profile & Password and Manage Subscription we can add something like Custom Forms where Brokers can make their own Checklists (Or maybe the ability to modify the current Checklists in the future?). Something very simple where they pick and forms that they want, or create new ones, arrange them any way they would like with drag & drop, label the new Checklist with a custom name, and pick to add it to their master drop-down list under + New Transactions Page. They will need the ability to modify and delete custom forms in case they screw up or need to change things around.
